Upon registration you will receive the Zoom/Teams link to participate in the Webinar.

Description of webinar

The Strengthening Families Programme 10–14 (SFP10-14) is a USA-developed universal group-based intervention which aims to prevent substance misuse by strengthening protective factors within the family. This webinar will present findings from a randomised controlled trial (RCT) of the Strengthening Families Programme 10-14 UK (SFP10-14) which took place in Wales. It will provide some background to the programme, before describing the trial design and methods. The remainder of the talk will focus on the main trial results and the key insights from the process evaluation which explored intervention implementation.

A recording of this webinar and the speaker's slides will be available on the AFINet website following this webinar. Future AFINet webinars are advertised on the AFINet website:

<http://www.afinetwork.info/>

AFINet aims to:

- bring together researchers, policy-makers, practitioners, and experts through experience,
- promote the well-being of family members, friends, and colleagues affected by or concerned about another person's problems with or addiction to alcohol, drugs or gambling, and
- develop research, policy, practice, and advocacy in the field.

AFINet membership (free) is by application:
